BURNER / SEQUENCE CONTROLLERS (For Big Size Burners)

100 / 200 / 300 Series Controllers

[Request a Quote](#)

[Download Catalogue](#)

Oil fired Burners/ Boilers:

- 107 - S - 60, 107 - S - 30 (Standard models with pre purge time of 60 Seconds and 30 seconds)
- 107 - S - FO (controller for furnace oil)
- 107 - M (suitable for Nestler Boilers)
- 107 - TU

Product Range

- ▶ Burner / Sequence Controllers
- ▶ UV Sensor and Amplifiers
- ▶ Flame Rod Amplifier
- ▶ Burner Controllers
- ▶ Flame Sensors
- ▶ Flame Amplifier
- ▶ Ignition Transformer

LS - 107 (suitable for IAEC make boilers)

150 - P - 6 (equivalent to MA - 150 Controller)

Gas Fired Burners / Furnaces with UV flame sensing.

Without Pilot flame proving :

307 - GI - S Gas controller, with inbuilt UV Amplifier.

307-GE - S, Gas controller, with external UV AmplifierWith Pilot Flame, Damper, Blower and

Ignition terminals :

307 - GID - P (inbuilt Amplifier) & 307 - GE - P (with external amplifier)

For Gas fired Burner / Furnaces with Flame Rod sensing :

207 - FR-S, with pilot valve option.

207 - FRD - AP21 without Pilot. (functionally compatible to LGB - 21) Controller.
